

Access Control Mini

OMNITEC presents a new model of MiFare access control, for indoor or outdoor use. Its size and design allow it to be integrated into any hotel environment, and control both main doors and areas with restricted access to guests.

features

- With a sophisticated and discreet design, the MINI access control is the ideal solution for those common areas of the hotel, special or restricted, where the installation of an electronic lock is not possible.
- The MINI access control is managed with the Omnitec software and allows total control over all access points.
- Designed and conceived for access control to common areas such as: lift, spa, gym, restaurant, conference room, hotel entrances (reception), etc.
- MINI controls the access of room doors equipped with an electric strike, instead of a traditional hotel lock.
- Both the MiFare card reader and the control unit have been integrated into a single device, creating an easily to install unit.
- Anti-humidity rubber gasket included to be used in those zones that need it.
- **Audit trail** of the last 400 events registered..
- Power supply: 12V AC/DC (220V 50Hz power cord supplied)
- Temperature: -10 °C ~ 70°C
- Humidity: 20% ~ 90% RH
